OPEN FORUM

Prostate health issues and how to treat them are probably the most controversial subjects in men's health. What's a man to do? There are so many choices. What are the best options both conventional and on the alternative side? Are there steps I can take pro-actively to keep from having prostate problems? How about slowing the progression of prostate cancer if I have it? The recurrence rate is extremely high after therapy, are there steps I can take to avoid that possibility? Let's see if we can answer some of these questions together.

PAF meetings are a great way to learn and to connect with other men and their families dealing with prostate issues. Women are welcome, you do not have a prostate to attend. Time will be available to answer your questions and concerns.

Statistics indicate that cancer patients in support group settings live twice as long as those not involved. Come join us for support, information and discussion. Call Ken Malik at 415-407-3961 or email kamalik@prostateawarenessfoundation.org
