The Prostate Awareness Foundation (PAF) offers information, support, and education about the treatment options available to those with prostate cancer. The object is to lessen the trauma, impact, problems, and depression associated with the disease and to encourage proactive responsibility for one's own healing. We also offer information to those who wish to take a preventative approach to the disease. Based in Sonoma County and the San Francisco Bay Area, we have been providing this service, nationwide since 1995.
